Application for Associate Application Developer, Oracle.

Dear Hiring Manager,

I am a final year student at National Institute of Technology, Patna under Computer Science department. I am highly interested in your Associate Application Developer program. Apart from the creative environment at Oracle, this program has deeply attracted me with challenging yet rewarding job scope. What's more, the ideal match between requirements and my qualifications further built up my confidence in applying for this program.

I am a front-end web developer and also I have good knowledge of back-end technologies. I have done several projects both independently and in a team as well in this domain. Apart from this, I also have good knowledge about the Data Structures and Algorithms domain. I am also a 4* coder at CodeChef and also I actively do questions on LeetCode and GFG as well.

I am hardworking, motivated and I can work well both individually as well as in a team. In addition to my technical skills I also have polished my communication skills and sense of responsibility, which better suit me for this position.

Together with my analytical and technical aptitude, learning ability and communication skills, I am confident that I will make a positive contribution to Oracle.

Thank you in advance for your time and consideration. I would really appreciate an interview opportunity and look forward to hearing from you soon.

Yours Sincerely

Arnav Ranjan
